# Triple Offset Butterfly Valves

Complete Solutions for Industrial Valves

**NEWAY VALVE**

Cat.no.:E-TOV-2016

# Table of Contents

## Introduction

- 1 Quality Commitment
- 2 How to Order

## Triple Offset Butterfly Valve

- 3 ~ 6 Design Features
- 7 Material Specifications
- 8 ~ 13 Dimensions & Weights

## Engineering Data

- 14 ~ 17 End Connection Dimensions
- 18 Min. Pipe I.D. for Disc Clearance
- 19 Dimensions of Top Flange
- 20~ 22 Valve Operating Torque
- 23~ 24 Flow Coefficient (Cv Value)

## Complete Solutions for Industrial Valves

As a global leader of valve manufacturing, Neway (SSE:603699) is dedicated to the production, research, and development of industrial valves. Neway is committed to providing complete valve solutions to all industries through advanced engineering and innovation.

Neway's product line includes Ball, Gate, Globe, Check, Butterfly, Nuclear, Control, Subsea, Safety valves. Our high quality standards and innovative ability are recognized by many global end users and EPCs. Neway valves are utilized in a wide variety of industries and working conditions such as Gas, Oil, Refining, Chemical, Coal Chemical, Offshore, FPSO, Air Separation, LNG, Nuclear Power, Power Generation, and Pipeline Transmission applications.

## Facilities & Service

Neway has developed a sophisticated multi-plant management system operating one valve assembly plant, one API6A valve plant, three foundries, and one R&D center. Our newest assembly plant was expanded in 2013, and it now covers 35,000 square meters.

Advanced software (ANSYS, FE-Safe, CF-Design, Siemens PLM and NX) is applied here at Neway for the Research & Development of products. We use SAP to control the traceability and status of all products during the manufacturing process. In order to ensure the safety, eco-friendliness, and reliability of our products, we use the most advanced fire-safe, cryogenic, high pressure, and fugitive emission test equipment.

As part of Neway's global strategy, to provide better service to our customers, we have established our overseas subsidiaries in North America, Brazil, Netherlands, Italy, Singapore, and Dubai along with over 80 agents and distributors worldwide.

## High Quality, High Value

Neway is dedicated to the pursuit of "Zero Defect". We maintain a quality management system that encompasses our entire operation from order entry, to final inspection. Through Neway's continuous efforts, our products have achieved industrial certificates including ISO 9001, API Q1, API 6A, API 6D, CE/PED, ASME N & NPT, TA-Luft, ABS, CU-TR, and Fire-Safe approvals.

Fire Safe Test

Neway recognizes the importance of valve quality for the safety and protection of personnel health and property. It is our quality commitment to focus our resources to provide our customers with first class products at a competitive price, designed, manufactured, inspected and tested in accordance with our customers specifications, while complying with all international standards.

Current industrial standards do not always take into consideration the likelihood and consequences of possible deterioration, related to specific service fluids or the external environments in which they operate; Therefore, we request that our customers communicate with our engineering department. Our valve optimization program continuously strives to provide valves that withstand deterioration in service, and ensure safety over the valves expected lifetime.

## Figure Numbers

Neway figure numbers are designed to cover essential features. When ordering, please show figure number to avoid misunderstanding of your requirements. However a detailed description must accompany with any special orders.

### 1 Valve Size

3 = 3"	(DN80)	24 = 24"	(DN600)
4 = 4"	(DN100)	28 = 28"	(DN700)
6 = 6"	(DN150)	30 = 30"	(DN750)
8 = 8"	(DN200)	36 = 36"	(DN900)
10 = 10"	(DN250)	42 = 42"	(DN1050)
12 = 12"	(DN300)	48 = 48"	(DN1200)
14 = 14"	(DN350)	52 = 52"	(DN1300)
16 = 16"	(DN400)	56 = 56"	(DN1400)
18 = 18"	(DN450)	60 = 60"	(DN1500)
20 = 20"	(DN500)	64 = 64"	(DN1600)

### 2 Triple Offset Butterfly Valve

CF8	A351 Grade CF8
CF3M	A351 Grade CF3M
CF3	A351 Grade CF3
CN7M (Alloy 20)	A351 Grade CN7M

Industrial valves require higher temperature and pressure ranges that are beyond the capacity of conventional butterfly valves. For this reason, Neway has developed the metal-seated Triple Offset butterfly valve as a solution for the toughest industrial applications. Neway's TC Series butterfly valve offers a light-weight, cost-effective, and compact design with a low operating torque. Additionally, it can replace traditional Gate, Globe, and Ball valves in most industry applications.

## Design Features

## Product Range:

Design Standard:	API 609, ASME B16.34
Flange:	ASME B16.5, ASME B16.47
Structure Length:	API 609, ISO 5752, ASME B16.10 Gate
Size:	3" ~ 120", DN80~DN3000
Rating:	CLASS 150~CLASS 2500, PN16~420
Temperature Range:	-196°C~650°C
Disc Sealing:	Graphite/Metal laminated, Solid metal
End Connection:	Wafer, Lug, Flanged

## Typical Applications:

- Petrochemical
- Refinery
- Shipbuilding Industry
- Power Plant
- Steel Mill
- Water Treatment

The Neway TC Series butterfly valve has a true metal-seated, quarter-turn design for Bi-directional service. It is fire safe by design, and it eliminates the innate problem of material aging and deformation in soft seated butterfly valves. Full metal construction and increased material compatibility make TC butterfly valves ideal for most process and control applications.

### Triple Offset Frictionless Design

- 1<sup>st</sup> offset: The stem shaft is offset from the sealing surface plane, allowing for a continuous engagement of the seating surface.
- 2<sup>nd</sup> offset: The stem shaft's rotation axis is offset from the center of the bore, removing contact between the seat and the seal ring through most of the disc's travel.
- 3<sup>rd</sup> offset: The conical seating surface is offset asymmetrically to eliminate friction during opening and closing.

### Low Opening & Closing Torque

Neway TC Series butterfly valves combine the three offsets of the seating surface with the flexibility of graphite lamination to achieve a tight and uniform seal with a low required torque.

### Zero Leakage

Laminated seal rings are designed to self align and allow valves to meet zero leakage per API 598.

### Fire Safe Design

Standard TC Series butterfly valves are not soft seated and can meet API 607 fire test requirements.

### Anti-blowout Shaft

Double anti-blowout design satisfies API 609 and ASME B31.1 requirements through both internal and external stem retention.

Top Retention: Packing gland follower retains the stem integral collar.  
Bottom Retention: T shaped attachment prevents stem blow-out.

Upper part retained

Lower part retained

### Low Emission Shaft Seal

Neway can supply packing to limit fugitive emission rates down to 20 ppm\*

- Shaft is fully guided by shaft bearing & gland follower to reduce side load due to line pressure thrust.
- The packing set is pre-compressed and is a combination of braided graphite rings and die formed flexible graphite rings.
- Controlled Ra0.4~Ra0.8 finish on the shaft and Ra1.6 on the Stuffing box provides optimum packing and shaft sealing.
- Optional Live Loaded gland flange available to provide constant packing compression to reduce fugitive emissions.
- Optional shaft seal design available per Shell MESC 77/312 & TA-Luft.

\* 20ppm per sniffing method with helium gas.

### Compact Design

Neway triple offset butterfly valves are designed to API 609 and offers flow control solution in a compact design. The TC series provides a light weight solution to bulky gate, globe, and ball valves when space or weight are at a premium.

**Notes:**

- 1) Torques shown are based on ambient temperature
- 2) Torques shown in this table are to be used as a guide for actuator selection. A safety factor of 1.3~1.5 is recommended for actuator sizing.
- 3) It is recommended that a margin of 5 should be kept for adjustment at opening and closing position of the actuator.
- 4) For more information, please contact Neway engineering department.

### Notes:

- Definition:**  
 $C_v$ : The volume of water in gpm at 15°C that will pass through a valve with a pressure drop of 1 PSI.  
  
 $K_v$ : The volume of water in m<sup>3</sup>/hr at 15°C that will pass through a valve with a pressure drop of 1 bar.
- Flow direction: vertical to shaft
- $C_v = 1.155 K_v$

## Product Warranty

Seller will replace without charge or refund the purchase price of products which prove to be defective in material or workmanship; provided that the product is properly installed and is used in the service for which the Seller recommends it and that the written claim, specifying the alleged defect, is presented to the Seller within 18 months from the date of shipment or 12 months after installation, whichever occurs first. Seller shall in no event bear any labor, equipment, engineering or other costs incurred in connection with any repairs or replacement. The warranty stated in this paragraph is in lieu of all other warranties, either expressed or implied. With respect to warranties, this paragraph states the Buyer's exclusive remedy and seller's exclusive liability.
